ART. 5 – ROUTE – EVENT EXECUTION

5.1 – ROUTE

The route will be **1.078,78 Km** long and will be described in the Time and Distance Schedule enclosed to the present particular regulation, of which it is an essential part, and on the Road Book. The Time and Distance Schedule will describe also the way in which the chrono trials will be carried out.

There will be:

- n. 100 chrono trials
- n. 10 average trials
- n. 12 time checks
- n. 12 stamp checks.

The event will start in Mantua – Piazza Sordello, on 16/09/2022 at 10:45 and will end in Mantua – Piazza Sordello, on 18/09/2022 at 14:30.

The event will take place on roads open to normal traffic with an average speed of 50/km maximum.

5.2 – STRETCHES OF ROUTE NOT SUBJECT TO TIME CHECKS

- 1st Stage – Friday, 16th September: after the C.O. in Cesenatico, free transfer until the arrival point in Piazzale Fellini, Rimini.
- 2nd Stage – Saturday, 17th September: after the C.O. in Gros Rimini, free transfer until the arrival point in Piazzale Fellini, Rimini.

- 3rd Stage – Sunday, 18th September: after the C.O. in San Benedetto Po, free transfer until the arrival point in Piazza Sordello, Mantova.

In these stretches of road, competitors are still invited to adopt the utmost caution and to strictly adhere to the rules of the road.

5.3 – STARTS

During the three-day event, the starting stages will be given separately; the car must be stopped with the engine running. Three cars per minute will leave, with an interval of 20 seconds between each car.

5.4 – STARTING ORDER

Traditionally the No. 1 will be reserved for the memory of the great motoring champion Tazio Nuvolari. The numbers from No. 2 onward will be assigned to drivers between 1st and 10th place in the ranking of the Campionato Italiano Grandi Eventi (CIGE), according to the order of seniority of the cars.

After the "CIGE grid", the other drivers registered will start following the age of the cars in an increasing order from the oldest to the most modern.

The starting order will remain the same for all 3 stages of the race.

5.5 – EVENT EXECUTION

Passage time checks (C.O.) will be recorded in the moment in which a crew member will bring the schedule to the time keepers for the time annotation. The transit time will coincide with the closing time (per minute) of the preceding area and the starting time of the following area. The crew will be considered on time if it passes at the C.O. at the exact reference time, hour and minute (60 seconds, from second "0" to second "59"). The chrono trials (P.C.) will be measured with a pressure switch connected to a writing device, with a precision of 1/100 second, without any tolerance. Departures will be free.

The start of the average trials (P.M.) will be measured with a pressure switch connected to a writing device, without annotation of it on the schedule, and with an interval of at least 20 seconds between a competitor and another. The average is measured between the beginning and the end of the trial in many points, which are unknown to the competitors. The transit time will be detected to the second, rounded down, through the GPS-Tracking equipment installed at the pre-race checks. The number of measures to be done for each trial and the average speed to be respected will be written on the Time and Distance Table and on the Schedule. The Road Book contains the theoretical maximum limit at the end of the average trial. The penalties of the single P.M. they will be determined by the sum of the advance or delay seconds acquired by the competitor in each measurement.

5.6 - "NUVOLARI COEFFICIENT"

The "Nuvolari Coefficient" will be applied in order to transform the penalties scored by each crew during the competition. The coefficient is assigned according to the following computation: 1+ year of construction of the car/100.

So, the final sum of all the penalties obtained by each crew will be multiplied by the coefficient assigned to each car.

1st Example

- Year of construction of the car: 1919
- Car coefficient: $(1+19/100) = 1,19$
- Hypothetical penalties obtained by the competitor: 500
- Final score: $500 \times 1,19 = 595$

2nd Example

- Year of construction of the car: 1969
- Car coefficient: $(1+69/100) = 1,69$
- Hypothetical penalties obtained by the competitor: 500
- Final score: $500 \times 1,69 = 845$

5.7 - TIME CHECKS

Below is the table of penalties for Time Checks (C.O.):

- | | |
|---|---------------|
| - For each minute or fraction of advance: | 100 penalties |
| - For the first 2 minutes or fraction of delay: | 25 penalties |
| - For delays over 2 minutes, up to 5 minutes: | 50 penalties |

- For delays over 5 minutes, up to 10 minutes: 100 penalties
- For delays over 10 minutes, up to 20 minutes: 200 penalties
- For delays over 20 minutes, up to 30 minutes: 300 penalties
- For any delay beyond the Maximum Time: 12.000 penalties

5.8 – TRAFFIC LAWS

The Gran Premio Nuvolari is not a speed race but a Regularity event with Chronometrical Trials, Average Trials, Time Checks and fixed-time Stamp Checks: the hourly average and the mileage times have been estimated to allow an easy arrival to the checkpoints.
